

ASSIGNMENT.

Your end of term assignment is to plan, design and build a **Prototype web application to control a smart home device.**

You need to submit:

- **Wireframes.** Annotate these wires with notes to explain why you choose particular layouts/ideas/features.
- A **high-fidelity concept** of at least 3 screens from the wireframes.
- **A live coded website.**

Your website should:

- demonstrate solutions/features included for your users
- use design and layout to aid the user experience
- pass HTML validation (<https://validator.w3.org>)
